FOREWORD.

I have much pleasure in placing in your hands my 1923 Catalogue of Roses, Fruit Trees, &c. As mentioned in last year's Catalogue the new Nursery is now well established. The Buildings, &c., have been completed on a large scale to ensure, not only the growing of the different plants under correct treatment, but for the speedy handling and packing of orders to all parts of the State.

The situation of the fine 20-acre area, comprising the Nursery, is ideal, and the character of the soil unapproached by any other Nursery in the State. All general nursery lines are now being raised, including Oranges and Lemons, Stone Fruits and other varieties, with a good area devoted to Roses, all of which show exceptionally fine growth, and are particularly healthy. Those who contemplate planting this season will do well to view my plants, &c., before purchasing elsewhere. I can assure them of my best endeavour to serve to their entire satisfaction.

To those who cannot spare time during week days I send a special invitation to inspect the Nursery on a Saturday afternoon, when I, or one of my staff, will be pleased to give you the opportunity of viewing the very fine stock of Nursery lines available.

Thanking you again for your very fine support and recommendations, which I much appreciate, and hoping, by strict attention to your commands, to merit the continuance of your liberal support.

E. A. LASSCOCK,

(Sole Proprietor),

LASSCOCK'S NURSERIES,

LOCKLEYS, SOUTH AUSTRALIA.

Lasscock's Nurseries

**Henley Beach Road, Mellor Park,
LOCKLEYS, South Australia.**

Telephone: Central 4485 (2 lines).

Address all Communications to—

**LASSCOCK'S NURSERIES,
POST OFFICE, LOCKLEYS, S.A.**

THE NURSERIES—HEAD OFFICE.

The new General Nursery, which covers 20 acres of land, situated on the Henley Beach Road, Mellor Park, is now well established. It is within the **third** tram section from the City, and the Henley Beach and Lockleys cars stop at the Nursery Front Gate.

THE BRANCHES.

The Port Adelaide Branch is situated at St. Vincent Street, next to Jones Brothers', and near the Old Port Adelaide Railway Station, 'Phone No., **Port 2741.**

The Glenelg Branch is situated at 52, Jetty Road, near to the Railway Terminus, 'Phone No. **Glenelg 291.**

Full stocks of all Plants, Trees, and Seeds can be obtained from both establishments.

The Central Market Branch, which is open for the sale of all plants and seeds **every Friday and Saturday**, will be found at the rear of Bishop's, Gouger Street, Refreshment Rooms, at the end of the second promenade from Grote Street.

TERMS OF BUSINESS.

Ordering—Name and Address.—Customers when ordering, are requested to give their full name and address, together with full directions as to how they wish the goods to be sent, whether by carrier, rail, or boat, and to whose care the goods must be consigned.

Substitution.—Whilst every endeavour is made to fulfil all requests, it is some times impossible to do so, when orders reach me well on in the season, and certain varieties are sold out. Customers will oblige by adding a few extra names of varieties, as a second choice, and giving the right to substitute.

Selection of Varieties.—When the choice of varieties is left to me, I will carefully select the most desirable sorts, and the best varieties suitable to the customer's district.

Terms.—My terms are strictly cash, one month from the date of invoice to regular customers. With new customers a deposit with the order is necessary, or a satisfactory reference to some city firm must be given.

Remittance.—For ordinary payments, customers may remit by Bank Draft, Cheque, or Post Office Order. Small amounts should be remitted by Postal Notes, payable at Adelaide.

Packing.—Cases, Bags, and Straw Bundles, used in packing, will be charged at actual cost price. The greatest care is taken in the packing of all plants and trees, so as to ensure their arrival in good condition.

Parcels Post (a cheap and speedy delivery).—Roses, Plants, and Fruit Trees can be forwarded by Parcels Post to far distant parts of the State, or to the other States, at the following rates:—Limit, 11 lbs. for one parcel—Within South Australia: First lb., 6d., every additional pound, 3d.; Victoria, New South Wales, Queensland, Tasmania, and New Zealand: First lb., 8d., each additional lb., 6d.

Plants, Trees, Seeds, and Bulbs not included in this Catalogue.—I shall endeavour to procure any of the above that may not be herein listed.

For Better Gardens and Best Results.

I Want All Your Business—No order is too large, and none too small to receive prompt and personal attention.

DELIVERY.

As far as possible, we deliver all orders to City and Suburbs by our own conveyances. In most instances a regular delivery is made to the main Suburbs one day each week, and the following is a guide to intending purchasers in outlying Suburbs. **All orders 'phoned or sent in the day before can be delivered next day:—**

MONDAY.—Kilkenny, Woodville, Cheltenham, Alberton, Port, Glanville, Exeter, Semaphore (in morning). **AFTERNOON.**—Torrensville, Mile-End, City, or near Suburbs.

TUESDAY.—Victoria Park, Rose Park, Dulwich, Toorak, Kensington Gardens, and Norwood.

WEDNESDAY.—Morning—Port Adelaide delivery, same as Monday. **AFTERNOON.**—Wayville, Parkside, Goodwood, Unley.

THURSDAY.—Hindmarsh, Welland, Croydon, Bowden, North Adelaide, Prospect, Nailsworth.

FRIDAY.—St. Peters, Payneham, Magill, Tranmere, and Port Adelaide to Woodville.

SATURDAY — Mile-End, Torrensville, Hilton, Keswick, or near Suburbs.

CITY.—All orders are delivered every day to all business houses, firms, etc., throughout the city. Customers who can take delivery of their goods in city will help to relieve the heavy, long journeys to Suburbs. **We make a special effort to have goods sent to business premises each day to suit customers. Make use of our services and secure all your requirements from us.**

Lasscock's Nurseries, Lockleys, South Australia.

NEAR SUBURBS.—Such as Torrensville, Mile-End, Wayville, Rose Park, a delivery is made each day, according to orders received, and special trips are made to

FAR SUBURBS—Fullarton, Glen Osmond, Walkerville, Glenelg, and Brighton to fit in as near as possible with customers' wishes.

A CHARGE of 9d. per Delivery is made on all orders outside of City Radius, and to far distances, such as Semaphore, Largs Bay, Glenelg, Brighton, Fullarton, Glen Osmond 1/ is charged for each delivery.

SPECIAL NOTICE.

I have to again complain respecting various persons who are selling Roses and Trees as coming from my Nurseries. For Customers' own protection and my safeguard, I urge that they satisfy themselves as to the labelling of the trees.

All Roses and Trees coming from my Nurseries carry my special printed label. It is necessary to see that parcels of Roses and Trees are carrying this genuine Lasscock Label.

HOW TO GROW ROSES.

Hints for the Beginner.

Roses may be planted anywhere in the garden, in all soils where the situation is an open one, and the sun can reach them during some portion of the day.

Good drainage is essential. Surplus water must be carried off quickly. A drain, opened up at the lowest part of the garden, to which other drains may lead, may be used to carry off surplus water when the natural drainage is faulty. Such drains may be filled in with stones or rough cinders.

Where the trees are to be grown in the mixed flower borders, half standard roses will be favoured, so that annuals and other small plants can be grown around them. Low half-standards, showing about 12 to 18 inches of stem above the soil, are preferable to taller trees, which often become scorched on the stems, or "stock" as they are more often termed.

Dwarf worked roses, where the union with the rose proper and the "stock" is just below the soil, will give splendid results, and as many of these should be grown as possible.

Special rose beds will give the best results to the grower out for ideal blooms, for in these the watering can be regulated more satisfactorily.

Trenching the ground, particularly new soil, is worth while, the deeper the digging the better. If the top surface is removed to the full fork or spade depth, and the lower soil is broken up, so as to make the depth of loosened soil 18 in. in all, this will give good results and serve the purpose of the average grower. Opening the ground to a depth of 2 ft., or even 30 in., when exhibition blooms are desired, will ensure quality blooms over a longer term of years. Manures should be well worked into the lower soil.

Where the soil is sandy, such as is met with at the seaside, heavy loam, should, if possible, be worked into it, together with plenty of well decayed cow manure, decayed vegetable matter, grass, or seaweed, also bone dust, using about a couple of handfuls to each plant.

Lime, which has a binding effect on sand, and the reverse action on heavy land, should always be employed in rose growing. It should be spread on the surface and dug in before any manures are added. Subsequent watering will carry the lime through to the lower strata.

Heavy soils, which are the best for rose growing, should be lightened by first liming liberally, and afterwards adding sand, grit, decayed vegetable matter, and well decayed cow or stable manure. A sprinkling of bone dust, about a handful to each plant, should also be added. Avoid making the soil over-rich. Extra stimulant can be given the plants when they require it. This can be provided by a heavy mulch of half-rotted stable manure at the approach of hot weather, and by the application of dry or liquid manures when the flowering period approaches. Blood manure, superphosphate, or dried fowl manure can then be given as a top dressing, or liquid, made from cow manure, and a little soot, can be administered in weekly doses to the color of weak tea. Plants grown in good virgin soil will need very little manuring during the first two years, but liberal liming in this class of soil should not be omitted.

Soil preparation should be carried out some time before planting. Between the first digging and the planting, the soil should be frequently turned over to sweeten by the action of the air and sunlight. The more the soil is turned over the better. Frequent turning, at intervals of a week or ten days, is very necessary. With each turning the top soil should be left as rough as possible.

With plantings in an established garden, where the soil has been well worked, a couple of turnings may be sufficient.

HEELING IN.—It is not essential that the Rose plants from the Nurseryman should arrive on the very day, or the day before it is intended to plant them, neither is it a wise policy to plant the trees right away, because they happen to be delivered by the Nurseryman, unless the ground is properly prepared. If weather or soil conditions are not right for planting, or the grower has not time to give at-

For Better Gardens and Best Results.

tention on the arrival of plants, they should be taken to some odd corner, or an unused spot in the back garden, where a trench should be opened up, the trees unwrapped, and planted therein at a sloping angle. The soil should be drawn about the roots, made moderately firm, and a watering given. With this attention rose trees may there remain for some week or two before planting.

PLANTING.—Avoid planting roses in holes that eventually become waterlogged. This may happen with plants placed here and there in an established garden. The whole of the bed should be dug over to the same depth, in order to avoid the accumulation of water about the roots. Much depends upon the class of soil in which the planting is done, in some gardens large square holes may be taken out for planting without any fear of doing harm.

Standard roses will need support. Jarrah stakes, 1 in. square, are best. These should be placed in position before the trees are planted, to these the trees should be tied.

Roses may be planted 30 in. apart, this is very close planting, but the space may be increased with advantage to the plants, to 3, 4, 5, 6, or 8 ft. apart, according to the space at command. Strong growers will need plenty of elbow room.

Planting may commence in May and be continued until August. June is the most popular time for the task. Plants may be put in during April providing that by this time the copious autumn rains have arrived.

The depth of the planting should be determined by the soil mark showing on the plants as they come from the Nursery, although one may plant deeper to obtain a uniformity of height in the standards.

In planting take care that the manure does not come into direct contact with the roots. To avoid this surround the roots with some sweet soil taken from an unmanured portion of the garden. Make the planting firm; tread the soil around the plants before filling in the top spit. Give a thorough watering, and when the soil is workable, keep it loose on

the surface by shallow cultivation, with a fork or hoe.

PRUNING.—Root pruning is to be recommended before planting. Root trimming might best describe the operation. Large roots should be shortened, and any damaged portions removed by means of seccateurs. Any soft withered growth may be topped, but drastic pruning of the top hamper should be left until July, when the shoots should be shortened to a plump "eye" that is pointing outwards. The length of wood taken off should be determined by the vigor of the plant. Strong growers should be cut sparingly, allowing from six to eight leaf buds to remain. Weak growers should be cut to three or four buds. Thin out the centre growths to keep that part open, and remove any branches that are crossing to interfere with others, sacrificing the weaker and retaining the best, if possible.

NEW CLIMBING ROSES.

CHERUB (H.T.).—A Climbing Rose with good foliage and habit that in Spring is a mass of beautifully formed salmon pink flowers, gracefully displayed. It also flowers in Autumn, when, although the flowers are not so numerous, the colouring is superb, making this variety one of the most distinct of this popular class. 3/6 each.

LORETTO (H.T.).—A Climbing or Pillar Rose of most distinct and beautiful colouring, suggesting crimson overlaid with carmine. The foliage is mildew proof, and as the flower is sweetly scented and of particularly striking colour and large for its class, it must take its place as one of the best Rambling Roses sent out. It is at its best in Spring, but flowers well in Autumn. This Rose has been well tried at "Glenara," and has been greatly admired. 3/6 each.

For Better Gardens and Best Results.

CLIMBING MADAM E. HERRIOT (H.T.).—

A strong climbing sport from this well-known Rose. Having its beautiful colouring and being of a true climbing habit, will soon become one of our best and most popular climbers. Price 3/6 each.

CLIMBING MRS. AARON WARD (H.T).—

Another fine sport of true climbing habit, which will quickly become one of our best. Being Indian Yellow, large and full, and very free flowering. It is a colour wanted amongst our climbers. Price 3/6 each.

CLIMBING SUNBURST (H.T.).—

A particularly strong climbing sport that is only just getting known. The flowers are even better than the Dwarf grower, and the long shapely buds of deep yellow are its own recommendation. 2/9 each.

KITTY KININMONTH (H.T.).—

A brilliant Climbing Rose, producing huge decorative flowers which are a bright carmine rose colour. This Rose has enormous petals and is perfectly even in colour. Splendid green mildew proof foliage. Price 2/9 each.

SCORCHER (H.T.).—

A Climbing Rose, absolutely unique in colour and of decorative type. The flowers which are freely produced, may perhaps be best described as being of a true crimson carmine colour. It is a magnificent grower, with beautiful rich green foliage, which is absolutely mildew proof. Price, 2/9 each.

NEW ROSES OF RECENT INTRODUCTION.

Except where otherwise priced, Price 2/9 each.

ARGYLL (H.T.).—Large pure white blooms of good shape, freely produced.

BURGEMEISTER SANDBERG (H.T.).—Flowers large, colour soft rose, growth vigorous.

CAMBRAI (Per.).—A sport from Madam E. Herriot, colour being a delicate shade of orange, streaked with lemon.

COLUMBIA (H.T.).—A delightful shade of rose pink, which deepens as the flower ages. Strong grower, free flowering, good foliage, blooms fragrant. Awarded three Gold Medals in America. It promises to be one of our best Roses.

EARL HAIG (H.T.).—Deep reddish crimson that does not fade, flowers large and good substance. The growth is vigorous and good habit, with dark green foliage. Good blooms and sweetly perfumed.

ELIZABETH CULLEN (H.T.).—Dark crimson buds, long and pointed, blooms medium sized, semi-double with smooth petals of great substance. Vigorous grower and free flowering.

ETHEL SOMERSET (H.T.).—Shrimp pink edges of petal deep flesh coral pink, a lovely shade of color. Flowers large and full and high pointed centre. Good.

ETOILE de HOLLANDE (H.T.).—Bright dark red, erect growth and floriferous, very sweetly scented.

FLORENCE RUSS (H.T.).—A Rose that should be in every collection. The colour in early Spring is pink, in the centre shading to a pearly white at the edges of the petals. During Summer and Autumn the colour is saffron orange, shading to white at the edges of petals.

The flower is full and of perfect form, the petals being beautifully reflexed. With liberal treatment large enough for exhibition, and a good garden rose, being of perfect habit, upright, and branching. Slightly tea scented. The foliage is dark green and mildew proof. (Awarded gold medal N.R.S.V.), Price 3/6 each. Dwarf budded only.

GLOIRE de HOLLANDE (H.T.).—A large full flower of rich dark red. Distinct and of great excellence.

For Better Gardens and Best Results.

- F. W. DUNLOP (H.T.).**—A vigorous growing variety, producing perfectly shaped fragrant blooms of a rich deep pink.
- J. G. GLASSFORD (H.T.)**—Clear deep crimson lake. A clear solid colour which does not fade. Buds long and pointed, which open to large flowers of great substance.
- MADAM BUTTERFLY (H.T.).**—A glorified sport of Ophelia, said to be freer in growth and intensified in colour than its parent. Flowers freely produced and deliciously fragrant.
- MRS. H. R. DARLINGTON (H.T.).**—An exhibition Rose, very free and well formed. Colour creamy yellow, sweetly perfumed and free growth.
- MARGORIE BULKELEY (H.T.).**—Strong, vigorous, free branching growth, buds large, full, and pointed. Colour buff ochre, heavily flushed rosy pink, developing to silvery pink as the flower ages.
- MISS LOLITA ARMOUR (Perf.).**—Large very full blooms of distinct colouring, described as burnt orange, and copper shading to chrome yellow at base.
- MRS. E. T. STOTESBURGH (H.T.).**—A long pointed flower after the style of Mrs. G. Sawyer, but not quite so dark. A splendid grower. Suitable for garden or exhibition purposes.
- MRS. JOHN COOK (H.T.).**—Colour ivory white, occasionally suffused with light pink during cool weather, but usually opening clear white in every petal. One of the largest Roses offered.
- PRINCESS VICTORIA (H.T.).**—Colour, glowing scarlet crimson, with ochre orange base, perfect form and free flowering.
- PILGRIM (H.T.)**—Silvery pink with outside of petals clear rose pink. Splendid shape and full, with delightful tea fragrance. Mildew proof.

REV. F. PAGE ROBERTS (H.T.).—Blossoms large, full, and well formed, of a beautiful rich "Marechal Neil" colour, with buff markings on the reverse of petals. Both for exhibition and decorative purposes it should prove a great acquisition.

ROSE MARIE (H.T.).—Long buds of perfect shape, opening to full flowers of an even shade of rose pink. It is particularly free flowering and possessing mildew proof foliage and good growth.

SECRETARIS ZWART (H.T.).—Growth vigorous and very free flowering, flowers large and attractive. Colour bright rose.

SUNSTAR (H.T.).—Deep orange and yellow edge, veined and splashed crimson and vermilion. Colours that attract and delight, and vary in tone and intensity as the bloom develops. The growth is vigorous, erect, and branching, flowering in great profusion continuously throughout the season. One of the best decoratives of recent introduction.

SWEET SEVENTEEN.—Raised by Alister Clark, Esq., colour soft blush pink. Growth medium, upright, and compact. Foliage light green and mildew proof. Sweetly scented and ever blooming. Dwarf budded only. Price 3/6 each.

THE GENERAL (H.T.).—Colour, blood red, flushed orange, flowers large, pointed globular, fragrant damask perfume, flowering continuously late in season.

UNA WALLACE (H.T.).—Beautiful soft well-toned cherry rose, without shading. In depth, formation and substance it is faultless.

VICTORY (H.T.).—Glowing scarlet, blossoms, long semi-double of good form, growth free.

LADY MAUREEN STEWART (H.T.)—Velvety black, scarlet cerise, shell-shaped petals, whose reflex is solid, pure, orangey maroon without veining. An excellent bloom, ideal

For Better Gardens and Best Results.

shape, brilliant non-fading colour, with heavy musk rose odour.

WESTFIELD STAR (H.T.).—A distinct lemon yellow sport from Ophila. Possessing all its excellent characteristics.

W. F. DREER (Per.).—Deep golden yellow, heavily shaded peach and old rose. A good variety of splendid growth and very free flowering.

YVES DRUHEN (H.T.).—Growth vigorous and branching, flowers fairly full, colour dark velvety red. Highly perfumed.

—:o:—

ROSES.

GENERAL LIST OF SELECTED VARIETIES.

This up-to-date list contains only the names of varieties that are well worth growing. Varieties that have proved unsatisfactory have been discarded. The best of the newer Roses have been added.

Lasscock's Roses, grown under perfect conditions, will be found wonderfully vigorous and clean, and customers can rely upon satisfactory results following their planting.

DWARF ROSES.

I would again point out the superiority of the Dwarf worked and Bush Roses. Stronger plants, finer blooms, and greater satisfaction will follow their planting, particularly when they are grown in beds or borders for a massed effect.

ABBREVIATIONS.

Describing the Various Rose Classes.

T.—Tea Scented.

H.T.—Hybrid Tea.

Lasscock's Nurseries, Lockleys, South Australia.

- Kaiserin Augusta Victoria** — Cream, slightly shaded lemon, deeper in centre H T
- Konigen Carola**—Extra large, satiny, rose-coloured flowers; one of the best H T
- K. of K. (H.T.)**—Intense scarlet, huge solid petals, vigorous and branching. Semi-double
- Kootenay (H.T.)**—Primrose yellow; large and globular, of good substance.
- Lady Ashtown**—Bright china pink, very free flowering H T
- Lady Alice Stanley**—Deep coral rose on outside; inside pale flesh; large, full, and fragrant H T
- Lady Battersea**—Buds long and pointed, beautiful cherry crimson, with orange shade . . H T
- Lady Greenhall**—In intense saffron-orange on a deep cream-white ground, suffused delicate coppery shell-pink; a charming and free-flowering Rose; good foliage, erect stems . . H T

Lasscock's Nurseries, Lockleys, South Australia.

- Lady Hillingdon**—Orange-yellow; long buds, half-full flowers; free blooming and attractive H T
- Lady Maureen Stewart**—See new Roses of recent introduction. Page 12.
- Lady Plymouth**—Colour delicate pearly deep ivory cream, faintly flushed with pink T
- Lady Roberts**—Rich apricot, base of petals coppery red, edges shaded orange T
- La France**—Beautiful silvery Rose; large and full and free flowering, sweetly scented . . H T
- Laurent Carl**—Brilliant vervety carmine; large perfect form; not too full, growth vigorous H T
- Lena**—A grand garden Rose; colour glowing apricot; the edges of the petals a primrose-yellow as the flower ages; buds long and perfect T
- Lilian Moore (H.T.)**—Deep Indian yellow, large and full, perfect camellia shape. Buds long and pointed. One of the best.
- Los Angeles**—A luminous pink, shaded at base of petals with translucent gold; perfumed and exquisite H T
- Lyon Rose**—Shrimp pink, centre coral red or salmon, shaded chrome-yellow; large and full H T
- Mabel Drew**—Deep cream passing to canary-yellow as the blooms develop; perfumed; good growth H T
- Madame Abel Chatenay**—Carmine pink, shaded vermilion and salmon, very free flowering H T
- Madame Antoine Marie**—Soft rosy pink, with creamy white centre T
- Madame Berard**—Rich salmon, tinted with yellow T
- Madame Butterfly**—See new Roses of recent introduction. Page 11.
- Madame Caristee Martel (H.T.)**—Pure sulphur yellow, deeper in centre, enormous size.
- Madame Constance Soupert**—Deep yellow, shaded peach-carmine, flowers large, perfect form T

For Better Gardens and Best Results.

- Madame E. Herriot**—Superb colouring, coral red, shaded with yellow and a bright rosy scarlet, passing to prawn red, a brighter rose of the "Lyon Rose" type H T
- Madame J. Bouche**—Salmon-white, centre shaded rose, flowers large, full, and perfectly formed H T
- Madame Jules Grolez**—Satiny china rose, very bright, large, and full, always in bloom . . H T
- Madame Leon Pain** — Silvery salmon, centre orange-yellow, back of petals salmon pink . . H T
- Madame Meha Sabatier (H.T.)**—Vigorous growth, velvety crimson bud, large, full flower, colour bright crimson, a grand garden rose.
- Madame P. Euler (H.T.)**—Vermilion pink, changing to silvery pink; very large, full flowers.
- Madame Segond Weber**—Salmon pink, very large full flowers, splendid habit of growth H T
- Maman Cochet**—Flesh coloured rose, shaded with carmine and salmon yellow, a splendid rose T
- Marechal Niel**—Bright rich golden yellow . . N. CL
- Margaret Dickson Hammill (H.T.)**—Straw-colored, edged and flushed, delicate carmine on back petals, large blooms, free flowering, fine show and decorative.
- Margorie Bulkeley.**
- See new Roses of recent introduction, page . . ?
- Marie Adelaide**—Deep orange yellow, keeps its colour, good form, erect stems; vigorous and free flowering H T
- Marie Van Houtte**—Canary yellow, deeper in centre, border of petals tipped bright rose T
- Merveille des Rouges**—A grand colour, and good dwarf Polyantha Rose of bright red P
- Midnight Sun**—A semi-double Rose, deep glowing crimson, flushed with velvety black, vigorous grower, mildew proof H T
- Mildred Grant**—Ivory white, flushed pale peach H T
- Miss Alice de Rothschild**—Rich deep citron yellow, deliciously fragrant, free blooming, growth vigorous and erect T

Lasscock's Nurseries, Lockleys, South Australia.

Miss Lolita Armour.

See new Roses of recent introduction, Page 11.

Modesty (H.T.)—Colour pearly cream, flushed Rose, one of the best exhibition garden Roses.

Molly Bligh (H.T.)—Blossoms large, exquisite musk rose perfume, colour deep maddery rose.

Molly Sharman Crawford—A distinct and beautiful, pure white, free flowering, one of the best T

Mrs. C. V. Haworth—A refined Rose, colour cinnamon apricot, developing into biscuit buff, with a delicate cerise rose sheen on the reflex of the petals. The magnolia-like guard petals are flamed rose H T

Mrs. C. W. Dunbar-Buller—Colour veined warm clear rosy deep carmine on rosy white, with lemon base H T

Mrs. Aaron Ward—Indian yellow, very large and full, one of the best garden Roses H T

Mrs. Amy Hammond—Colour ivory, amber, and apricot, beautifully blended H T

Mrs. A. R. Waddell—Long buds of a reddish-salmon tint, good grower, producing a quantity of beautiful buds H T

Mrs. Bryce Allan—Solid matte carmine rose, blossoms are borne on erect flower stalks, a very highly-perfumed rose of great beauty . H T

Mrs. Charles Russell—Rosy carmine, with rosy scarlet centre, large, full, fine form, growth vigorous and free branching.

Mrs. David McKee—Creamy yellow, flowers large and full H T

Mrs. Edward Mawley—Carmine pink, shaded salmon T

Mrs. E. T. Stotesburgh.

See new Roses of recent introduction. Page 11.

Mrs. Foley Hobbs—Colour delicate ivory white, faintly tinged with clear pink on edge of petals, the flowers are of a marvellous size and perfect in form, first-class for exhibition T

For Better Gardens and Best Results.

- Mrs. Frederick W. Vanderbilt**—Deep orange-red, shaded bronze apricot red, quite distinct H T
- Mrs. Fred Searl**—Large fawny shell pink, reflex petals, carmine rose, deeper edges, strong tea perfume H T
- Mrs. George Shawyer**—Clear rose pink, flowers large and full, good strong stems H T
- Mrs. George Marriott (H.T.)**—Deep cream and pearl, suffused rose and vermilion. Very large flowers of perfect form. A good show variety.

Mrs. H. R. Darlington.

See new Roses of recent introduction. Page 11.

- Mrs. Henry Balfour (H.T.)**—Ivory white with primrose shading at the base, edge of petals vermilion rose. A good show and garden Rose.
- Mrs. H. Brocklebank**—Creamy white to yellow, with a delicate pink flesh, free flowering .. H T
- Mrs. H. Stevens**—White, with a distinct fawn and peach shading towards the centre, the petals are of great depth and substance; a free grower and perpetual bloomer, one of the best T

Mrs. John Cook.

See new Roses of recent introduction. Page 11.

- Mrs. John Laing**—Pink, large and fragrant .. H P
- Mrs. Mackellar (H.T.)**—Deep citron yellow in the young flowers, opening to pearly primrose white, large, full-pointed blooms.
- Mrs. Maud Dawson**—Brilliant orange carmine or brillion cerise, deeply-pointed flowers of ideal shape H T
- Mrs. Farmer**—A vigorous grower, brilliant bronze green foliage, colour Indian yellow, reverse of petals reddish apricot H T
- Mrs. R. C. Bell**—A deep red rose, with beautiful foliage that is mildew proof, sweetly scented H T
- Mrs. R. D. McClure**—Vigorous, free branching, large flowers of exquisite form, colour brilliant glistening salmon pink H T

Lasscock's Nurseries, Lockleys, South Australia.

- Mrs. Redford**—Colour white apricot orange, a splendid upright grower, with beautiful mildew-proof foliage; solid blood reflexed petals of perfect shape, a very free bloomer, and sweetly scented H T
- Mrs. Theodore Roosevelt**—Creamy white, rose coloured centre; most attractive and reliable H T
- Mrs. W. C. Miller**—Soft pearly blush, shaded salmon, outside of petals clear vermilion rose, large and full, growth vigorous . . . H T
- Nerissa**—Creamy yellow, tinted white; centre tinted peach; large and full H T
- Noblesse**—Apricot-primrose-yellow, flushed deep pearl-pink; a splendid rose and free flowering.
- Old Gold**—Vivid reddish orange, with rich coppery red and apricot shadings, dark coppery foliage; continuous flowerer H T
- Orleans Rose**—Colour brilliant geranium red, suffused rose, with white centre, making a charming combination; bushy habit, and very free flowering; splendid for bedding or borders, always in bloom; dwarf budded only P
- Papa Gontier**—Rosy Crimson T
- Perle des Jardines**—Canary-yellow; large and full T
- Perle des Rouges**—Deep velvety crimson, small and double, produced in clusters, blooming abundantly till late in the season. Dwarf . . P
- Perle D'Or**—Nankeen yellow; small and full . . P
- President Bouche (H.T)**—Coral red, shaded with prawn carmine red; a strong grower, with medium to large flowers; quite distinct.
- Pilgrim**—See new Roses of recent introduction. Page 11.
- Prince Charming**—Colour deep reddish-copper, with old gold base; beautiful and very attractive; free flowering H T
- Princess Victoria**—See new Roses of recent introduction. Page 11.
- Prince de Bulgarie**—Fresh colour shaded salmon; one of the best H T
- Prince Camille de Rohan**—Crimson-maroon, shaded blood red; rich and velvety; one of the best dark crimson H P

For Better Gardens and Best Results.

- Radiance**—Brilliant carmine, shaded salmon and coppery red H T
- Red Letter Day**—A beautiful semi-double Rose, velvety, brilliant, glowing scarlet-crimson buds; one of the best decorative Roses raised, blooming throughout the entire season H T
- Rev. F. Page Roberts**—See new Roses of recent introduction. Page 12.
- Rhea Reed**—Free-flowering variety possesses many good qualities; the flowers produced on long shoots and resist mildew H T
- Rose D'Evian**—Buds magenta, open flowers carmine, large and full T
- Rose Marie**—See new Roses of recent introduction. Page 12.
- Safrano**—Deep apricot, changing to buff T
- Secretaris Zwart**—See new Roses of recent introduction. Page 12.
- Servine**—Vigorous grower, erect branching habit; bronze-green foliage; large flower; beautiful coral-red, fading to prawn-red when fully expanded H T
- Souvenir de Marie De Zayas**—Very large, full and erect, perfect form; vivid carmine, veined deeper; very free and fragrant . . . H T
- Souvenir de Stella Gray**—Deep orange, with splashes of yellow, apricot, salmon, and carmine; a good bud Rose T
- St. Helena**—Cream, pink blush in centre, yellow at the base of petals; large and full . . . H T
- Sunburst**—Orange-yellow, with deeper centre; fine long-pointed buds carried on stiff stems; a magnificent garden Rose H T
- Sunny South (H.T)**—A fine new decorative Rose, raised by Mr. Alister Clark, colour, pink flushed carmine on a yellow base; good, strong habit of growth.
- Sunrise**—Outer petals reddish carmine, pale salmon within, beautiful bronzy foliage . . T
- Sunset**—Deep apricot, large and free-flowering T
- Sunstar**—See new Roses. Page 12.
- Sweet Seventeen**—See new Roses of recent introduction. Page 12.
- The Bride**—White, delicately tinged with rose.

- One of the best garden Roses T
- The General**—See new Roses of recent introduction. Page 12.
- Tip-Top**—One of the prettiest of the Dwarf Polyanthus Roses. Fine for edging. Orange-yellow, tipped carmine P
- Una Wallace**—See new Roses of recent introduction. Page 12.
- Victory**—See new Roses of recent introduction. Page 12.
- Warrior**—Long buds, blood red, opening to vivid scarlet crimson H T
- W. F. Dreer**—See new Roses of recent introduction. Page 13.
- W. G. Gaunt**—Brilliant velvety vermilion, reflex grand petals tipped scarlet, crimson-maroon on reverse H T
- Westfield Star**—See new Roses of recent introduction. Page 13.
- White Maman Cochet**—Creamy white, outer petals edged and tinged with rose; one of the very best T S
- William Shean**—A lovely pure pink Rose, immense size H T
- Willowmere**—Shrimp pink, shaded yellow in centre, edged carmine, after Lyon Rose type H T
- Yvonne Vacherot**—Buds long-pointed; colour porcelain white, suffused delicate soft pink; good for exhibition H T
- Yves Druhen**—See new Roses of recent introduction. Page 13.

CLIMBING ROSES.

- Aglaia (The Yellow Rambler)**—Bright canary yellow; small and full P
- American Pillar (Rambler)**—Clusters of single pink flowers with yellow stamens, one of the most beautiful climbers P
- Banksian Double White**—Clusters.
- Banksian Double Yellow**—Clusters.

- Bardou Job**—Bright crimson, shaded black; a fine pillar Rose H T
- Beauty of Glazenwood** (Fortune's Yellow)—Yellow, shaded bronzy fawn.
- Billiard and Barre**—Golden-yellow, large and almost full, good in bud; strong grower .. T
- Black Boy**—Magnificent climbing variety. Deep crimson shaded with blackish maroon, overlaying fiery scarlet, giving a rich luminous effect, and it is sweetly scented. A most distinct Rose.
- C. Johanna Sebus**—Bright cherry-carmine, yellow in centre; very distinct scent; vigorous grower; good exhibition and garden variety H T
- Climbing Chateau de Clos Vougeot**—A splendid climbing form of this very distinct variety, which is the darkest crimson H.T. Rose grown.
- Cherub**.—See new Climbing Roses. Page 8.
- Climbing Madame Abel Chatenay**—A true climbing sport of true favourite Rose H T
- Climbing Mrs. Aaron Ward**—See new Roses. Page 9.
- Climbing La France**—A splendid climbing form of this delightful, sweetly scented Rose .. H T
- Climbing Georges Schwartz**—The most effective yellow climber in existence. A vigorous grower T
- Climbing Belle Siebrecht**—A vigorous climbing form of the well-known variety of the same name; rosy pink, blooms large H T
- Climbing Frau Carl Druschki**—A vigorous sport from the well-known white H P
- Climbing Caroline Testout** — Bright salmon pink; large and full; one of the best H T
- Climbing Cecil Brunner**—Blush centre salmon-pink; a good buttonhole Rose P
- Climbing Comtesse De La Barthe**—Rosy flesh; strong grower, and free-flowering.
- Climbing Devoniensis** — Creamy white, with blush centre; very vigorous, free flowering.
- Climbing H. V. Machin**—A vigorous sport of the well-known variety. Prolific in flowering. A strong and clean grower H T

- Climbing Kaiserin Augusta Victoria**—A free blooming white with yellowish centre. Fine for exhibition H T
- Climbing Killarney**—Flesh-colour, shaded white and suffused with pale pink. A strong growing sport of the popular dwarf variety H T
- Climbing Lady Hillingdon**—Long buds of deep orange-yellow. A free bloomer T
- Climbing Liberty**—Brilliant velvety crimson . . H T
- Climbing Madame Edouard Herriot**—See new Climbing Roses. Page 9.
- Climbing Madam Second Weber**—A strong sport, producing flowers identical with the dwarf variety. A first-class climber H T
- Climbing Maman Cochet**—Flesh-coloured Rose, shaded with carmine and salmon-yellow, large and full, fine long buds; a charming variety and one of the best climbers T
- Climbing Ophelia**—Salmon flesh shaded Rose. Vigorous grower, perfect blooms on lengthy stiff stems H T
- Climbing Perle des Jardines**—Straw colour, sometimes canary yellow, centre orange-yellow, very large and full T
- Climbing Richmond**—In all respects except growth identical with the normal type, and of true climbing character H T
- Climbing Sunburst**—See new Climbing Roses. Page 9.
- Climbing White Maman Cochet**—A sport from "Maman Cochet," with creamy white flowers, outer petals tinged with blush T
- Cloth of Gold**—Pale sulphur-yellow, deep centre, large and very vigorous N
- Crimson Rambler**—Bright crimson, produced in clusters P
- Dorothy Perkins**—Shell-pink, flowers borne in large clusters; strong climbing habit; foliage good WICH
- Emily Gray**—A new Climbing Rose of golden yellow colour raised by Dr. William. This is the finest yellow Wichuriana ever introduced WICH

For Better Gardens and Best Results.

- Fortuniana**—Pure white; known as the “Bridal Rose”; good for covering unsightly places or fences.
- Flying Colours**—A vigorous climber, blooms bright deep cerise. An attractive Rose of great beauty; price 2s. 9d. each H T
- Gloire de Dijon**—Yellow, shaded salmon; large and full.
- Golden Vision**—A seedling from “Marechal Neil,” the old sweet-scented favourite. Bright foliage and golden yellow blooms, sweetly scented; price 2s. 9d. each T
- Gross an Teplitz**—Brilliant cinnebar scarlet, shaded with fiery red; a very effective decorative Rose of semi-climbing habit H T
- Gwen Nash**—Another first-class Climbing Rose of a beautiful shade of cyclamen pink, running down to a white base in the petals.
- Hauff (The Blue Rambler)**—With bluish purple flowers, produced in clusters, and quite distinct from any existing Rambler; a strong climbing variety MULT
- Hiawatha**—A fine single-flowered Wichuriana hybrid; flowers produced in long, trailing bunches; colour vivid, glowing crimson, with white eye; one of the best and most effective Climbing Roses W
- Jessie Clark**—The colour is like “Senica Anemone,” but the blooms are twice the size, and more like a very large Clematis; the plant is a vigorous climber.
- Kitty Kininmonth**—See new Climbing Roses. Page 9.
- Lady Medallist**—A vigorous Climbing Rose, large, full, perfectly-formed flowers, after the style of “La France”; the petals are pointed, and centre high; the colour is “La France” pink with lighter shading on reverse; the foliage is dark green.
- Lady Gay**—Bright glossy green foliage; rich rose-coloured cluster of flowers W
- Lady Waterlow**—Pale salmon-rose, edged with carmine, large semi-double flowers, very elegant; strong grower with good foliage; one of the best Climbing Roses H T

Lasscock's Nurseries, Lockleys, South Australia.

- La France de '89**—Brilliant rosy red; free and large H T
- Lamarque**—White; free flowering, and vigorous.
- Loretto**—See new Climbing Roses. Page 8.
- Macartney Grandiflora**—Large single white flowers, with beautiful shining foliage.
- Madame Berard**—Rich salmon, tinted with yellow.
- Madame Jules Gravereaux**—Buff-white, shaded peach and yellow, very large, good shape; vigorous; a good Climbing Rose T
- Marechal Niel**—Bright golden yellow.
- Miss Marion Manifold**—Rich velvet scarlet, shaded with crimson, very large, full, and of good form; free and continuous bloomer; scented; a vigorous climber suitable for arches, pergolas, or pillars; one of the best climbers H T
- Mons Desir**—Velvety crimson, shaded violet; very fragrant H T
- Noella Nabonnand**—Extra large semi-double, velvety crimson, with very large petals, very sweet, handsome in bud, and vigorous T
- Nora Cunningham**—A vigorous climber, suitable for tripods, pillars, and fences. Colour, pure pink in Spring; vivid in Autumn . . H T
- Paul's Scarlet Climber**—Vivid scarlet, shaded crimson, blooming for an unusual length of time for a Climbing Rose
(Hybrid Wichuriana)
- Philadelphia Rambler (Multiflora)**—In the way of "Crimson Rambler," but the colour of the flowers is brighter, deeper, and richer . . T
- Queen of Hearts**—A splendid Climbing Rose of a beautiful pink shade; free flowering, and good habit of growth H T
- Reine Marie Henriette**—A red "Gloire de Dijon" of climbing habit, with large and full flowers; a great acquisition as a pillar or Climbing Rose H T
- Reine Olga DeWurtemberg**—Very brilliant red, semi-double, very hardy and vigorous; good in bud, free H T

- Rosette de la Legion de Honeur**—Buds carnation-shaded cerise and vermillion; good for buttonhole T
- Ruby Ring**—A vigorous Climbing Rose, suitable for a pillar or hedge; it flowers in elegant sprays, and is very decorative; the centre is white, with a well-defined ruby edge; one of the prettiest and best Roses W
- Scorcher**—See new Climbing Roses. Page 9.
- Sinica Anemone**—Very beautiful single-flowering, light silvery pink at edges, gradually deepening to bright rose at base MAC
- Silver Moon**—Flowers semi-double, $4\frac{1}{2}$ inches in diameter, petals of great substance and beautifully cupped, clear silvery white, with bright yellow stamens; of strong climbing habit; with glossy bronze-green foliage WICH
- Souvenir de Leonie Viennot**—One of the most beautiful Climbing Roses; silvery rose, shading to carmine, base of petals canary-yellow, forming a lovely combination of colours; strong grower T
- Tausendschon (Schwartz)**—Pink, rosy carmine when expanded. Large cluster.
- The Lion**—Blooming in clusters, rich crimson in colour; a fine pillar Rose W
- White Dorothy Perkins**—Sport from "Dorothy Perkins," producing white or almost white flowers; a valuable acquisition.
- William Allan Richardson**—Deep orange-yellow, edged white; showy and distinct N

CHRYSANTHEMUMS.

Price 6d. each: 5s. per dozen.

We have a splendid collection of Japanese, Large-flowered, and Single varieties of up-to-date sorts. Plants ready from August to December.

CARNATIONS.

Price 1s. each; 10s. per dozen.

We have several thousand plants of real good varieties, with good calyxes, strong growers, and free flowerers. The sorts have all been proved, and include some exceptionally fine colours. Plants ready from March.

CUT FLOWERS.

Wreaths and Crosses of Choice Flowers, artistically arranged, from 5s 6d. upwards.

Wedding and other Bouquets made to order at reasonable prices.

Cut Flowers and Cut Fern supplied in any quantity.

All Country Orders specially packed and delivered to Adelaide Railway Station at shortest notice.

DAHLIAS.

All the best varieties in Cactus, Paeony, Collar-ettes, Pompones, Show, Singles, Decoratives, etc, For December planting, 1s. each; 10s. per dozen.

Collections at special prices

LAWN GRASS.

Buffalo Grass—10s. per sack; fine sample, good roots.

Couch Grass—7s. 6d. per sack.

"Mail" Lawn Grass—Seed.

Kentucky Blue, Chewing's Fescue, and Couch Grass—Prices on application

HEDGE PLANTS.

African Boxthorn—Strong plants, 2s. 6d. per 100; 20s. per 1,000; special quotations for larger quantities.

Carob (*Ceratonia Tiliqua*)—This makes a magnificent evergreen hedge, and is very hardy. Plant 4 to 5 feet apart. 1s. 6d. each; 15s. per dozen.

Ceanothus—When well clipped this makes one of the most ornamental hedges. It bears large quantities of blue flowers, which make it very effective. Plant 3 ft. apart. In pots, 15s. per dozen.

Cupressus Torulosus—A very pretty ornamental hedge. Plant 3 feet apart. 2s. 6d. each; 30s. dozen.

Coprosma Lucida—Makes one of the handsomest hedges, its bright leaves being always shining green, not holding the dust; quick growing, and hardy; strong plants in pots, 7s. 6d. per dozen; 50s. per 100.

Cupressus Lambertiana Horizontalis—One of the most beautiful hedges in cultivation. It is very hardy and immune from disease. The main stem (or leader) of each plant should be tied to a stake when planting, and allowed to grow to within six inches of the ultimate height of the hedge before it is clipped. Plant 4 to 5 ft. apart. In pots, 35s. to 48s. per dozen.

Cupressus Macrocarpa—Makes a very good, compact hedge. Price, 1s. 6d. each, 15s. dozen.

Duranta Plumieri—A neat-growing evergreen plant, bearing clusters of purplish blue flowers. 1s. 6d. each; 15s. dozen.

Kaffir Apple—20s. per 100.

Lauristinus—Very useful for a small hedge; Plant 2 feet apart. 1s. 6d. each; 15s. dozen.

Pittosporum Undulatum—This is the only variety of Pittosporum that makes a reliable hedge plant; 1s. 6d. each; 15s. dozen.

Plumbago Capensis—This makes a very showy and pretty flowering hedge, blue flowers; also can be had in white. Plant 2 feet apart. 1s. 6d. each, 15s. dozen.

Rhamnus Alternans—This makes a very reliable and dense hedge when well trimmed. 12s. 6d. per 100.

Spartium Junceum (Yellow Broom)—Will make a fine ornamental hedge if kept well trimmed. In pots, 15s. per dozen.

Tecoma Capensis—A fine red flowering hedge, very hardy and recommended by the "Mail" as a most desirable hedge. 1s. 6d. each; 15s. dozen.

Tagasaste (Tree Lucerne)—12s. 6d. per 100.

Wormwood—Makes an excellent hedge. Its silvery foliage gives it a most distinct appearance. 1s. each; 7s. 6d. per dozen.

Hints on Planting Fruit Trees, Vines, &c.

By **GEORGE QUINN**, Horticultural Instructor.
(Department of Agriculture, Adelaide).

To secure the best results, land intended for planting should be thoroughly prepared some time beforehand. If it be virgin scrub or forest land, a crop of cereals or vegetables may be taken off prior to fallowing it up in readiness for the fruit trees. In all cases the whole of the surface should be broken, and, unless the sub-layers are open and gravelly, the subsoil must be deeply stirred, but not brought to the surface more than can be avoided.

Lands with a stiff clay subsoil and situate in localities receiving more than about 25 in. of rain

For Better Gardens and Best Results.

annually, or to which irrigation water is to be applied regularly, will not give permanently good results unless provision be made for under drainage. This may be secured by pipe drains, slabs, or stones laid in by well-known methods.

In large areas the soil is broken by means of a subsoil plough being drawn along in each furrow made by an ordinary turning plough. This work is best performed in autumn or spring, when the surface is sufficiently wet to permit of a deep furrow being cut by the turning plough, and the subsoil is not wet enough to pug and make the draught of the second plough too heavy. On small areas this work is usually done by means of the spade and pick, or the subsoil may be fractured by the use of explosives inserted in each spot where a tree is to be set. The digging of large, deep holes is not recommended, more particularly into stiff clay subsoils. This preparatory work should, in all cases, loosen the soil to a depth of from 12 in. to 18 in., thus enabling the roots to strike freely down to a depth not rapidly affected by heat or cold.

In selecting positions for fruit trees, gentle slopes are always preferable to level land, excepting the soil be unusually deep and well drained naturally. The olive, almond, fig, grape vine, and pear are most suited to dry soils, though, singularly enough, the pear will thrive in land which would be too wet for any other kind of cultivated fruit tree. The quince and plum may be said to come next in resistance to saturation. The cherry, loquat, walnut, and persimmon delight in a deep, cool, moist soil, rich in organic matter, whilst the peach and apricot prefer light, deep, clay or sandy loams of a well-drained character. Citrus trees do not prove profitable, excepting when planted on deep, loose moisture-holding alluvials or sandy loams perfectly underdrained, naturally or by artificial means.

All fruit plantations must be secured against rabbits and other vermin by means of wirenetting or other close fencing. Shelter from rough or cold winds is essential in all cases. Wherever the contour of the surrounding land is not sufficiently pro-

Lasscock's Nurseries, Lockleys, South Australia.

tective, a belt of forest trees should be planted along the sides of the orchard open to prevailing winds. The nearest row should not stand less than 50 ft. from the first row of fruit trees, unless the soil be very deep and the moisture abundant. Of high trees, pines are preferable to gum trees—the Remarkable pine in wet districts and the Aleppo pine in those receiving less than 25 in. of rain per annum. These trees should be set from 6 ft. to 12 ft. apart in alternating rows, and receive surface tillage during the first few years. For smaller areas hedges or carob, tagosaste, tamarisk, or kaffir apple, or double rows of almond or loquat, or in some instances fig trees may be used to advantage. In still smaller plots fences of high palings or galvanized iron afford good shelter, and do not remove moisture or plant food from the land.

Trees are usually set over the surface of the land in figures representing squares or equilateral triangles. For commercial purposes the former is recommended as lending itself to convenient cross-working of the land for all time. The distances apart to plant the trees will depend on the kinds of fruits to be grown, as well as the richness of soil and supply of moisture available to them.

Under irrigation greater distances are needed, and 22 ft. apart on the square is usually necessary for practically all sorts of standard trees. In the ordinary soils of the non-irrigated or only slightly watered areas about 20 ft. squares usually suffice. At the former distance 90, and at the latter 108 trees can be placed upon an acre of land. In small home gardens cultivated by hand labor the trees may receive more minute attention individually, and consequently the distances may range from 16 ft. apart upwards.

The best time to plant deciduous trees and grape vines in this climate is during early winter, just after the first soaking rains have fallen and the soil is yet warm. They will then send out fresh fibres to repair their broken root systems, even whilst the leaves fall and the tops are going to rest. Before planting the trees the broken roots should be cut back to healthy tissues, and all fibrous roots

For Better Gardens and Best Results.

which are shrivelled may be clipped off as well. The roots and stem should be inserted into the soil about the depth they formerly stood in the nursery bed, as indicated by the soil marks and peculiarly discolored bark. If any animal manure is added to the soil about the roots it should be well decomposed, and only bonedust, or basic slag, amongst the purely phosphatic fertilizers are safe. A little blood manure or sulphate of ammonia may be used, but the latter only very sparingly. As a suggestion, about 1 lb. of bonedust, blood manure, or slag, or 4 ozs. of the sulphate of ammonia may be applied if well mixed with the soil. When farm-yard manures are used, only three or four good shovelfuls are needed. The soil should be firmly trodden down between and upon the roots at the planting time, and if it be dry an irrigation should follow immediately. Deciduous trees and vines should not be pruned back until after planting is finished, and then there is no hurry for a few weeks. Each tree should have a stake driven down in its position before it is planted. This is not to support the tree, but rather to indicate the spot it occupies, and protect it from knocks during the conduct of tillage operations for the first couple of years.

Citrus trees usually respond best when set out into the orchard in early spring, just as they give evidence of returning activity of vegetation. There is not the same danger of the first tender growth being injured by frost as is the case when moved late in Autumn and excited into tender growth, as they invariably are by the transplanting. They need cutting back severely immediately after the transplanting takes place if the root system of the tree has been mutilated or dried up. As this pruning usually exposes the bark to the sun, a thin covering of straw, wrapped loosely around each stem, proves an advantage.

FRUIT TREES.

APPLES.

Our stock of Fruit Trees this season number over 60,000, all of which are exceptionally strong, well shaped and rooted. Intending purchasers should inspect the New Nurseries, Mellor Park, and see for themselves the fine lot of Trees available.

PRICES—Apples, Apricots, Almonds, Cherries, Pears, Plums, Prunes, and Quinces, 2s. each, 21s. per dozen. Assorted, £6 per 100; 18s. per dozen for not less than six of any one variety.

Special Two-Year-Old Picked Trees, 2s. 6d. each; 27s. 6d. per dozen.

Beauty of Bath—Fruit medium size, roundish, beautifully striped and spotted with crimson in the sun; flesh yellowish, with a rich, spicy flavour; a valuable early dessert Apple, which has taken many first prizes in England. Summer.

Buncombe—Medium size. Regular bearer; dessert. Late.

Cleopatra—Medium to large, oblong to conical, skin clear yellow, flesh whitish, juicy and rich; good dessert quality; grown extensively in this State for export, and is undoubtedly one of the best we have for that purpose, as it succeeds over a wide range of country, and is a consistent bearer. Winter.

Cox's Orange Pippin—Very handsome, medium size, good export apple; grand dessert of excellent flavour; does well in special district.

Delicious (Syn. Chicago)—A beautiful dark red fruit; tree a strong, vigorous grower; great cropper, and bears regularly and early; both tree and fruit are perfect models. The former has heavy, dark green foliage, strong and finely-moulded limbs, adapted to bearing great weights of fruit, while the fruit itself does not burn with the sun. It can be picked as early as

For Better Gardens and Best Results.

the Jonathans, and will keep till October. Considered one of the best of all apples.

Dunn's Seedling—Fruit large, clear waxen yellow, with brownish red cheek; a good, solid, late-keeping, cooking apple; also useful for dessert; largely grown for export. Winter.

Emperor Alexander—One of the largest and most beautiful apples in cultivation; an excellent market variety; good cooking; fair dessert. Early Autumn.

Five Crown (London Pippin)—Fruit medium size, skin greenish yellow with brownish red cheek; good cooking or dessert; does well in the cooler parts of the State; fruit keeps well, and is good for export. Winter.

Granny Smith—A large and juicy Apple of a greenish yellow colour, late, heavy bearer, and highly esteemed for export in the other States.

Irish Peach—Medium size, roundish, rather flat and angular at the crown; skin yellowish green, streaked and spotted with brownish red; flesh white, tender, juicy, and very highly flavoured. One of the very best early dessert apples.

Jonathan—An American Apple of great excellence; fruit medium size, roundish, conical, skin clear light yellow, almost covered with bright rich red, dark red where fully exposed; of first dessert quality; an early bearer; excellent for market or export. Winter.

King David—A cross between Arkansas Black and Jonathan; colour dark red, with yellowish flesh; said to ripen before Jonathan, and may be an apple for export in season. Tree hardy, vigorous grower; quick cropper. Medium.

Maiden's Blush (Twenty Ounce)—Fruit medium to large, skin smooth, greenish yellow, with a beautiful red cheek; flesh white, tender, with a pleasant sub-acid flavour; good cooking or dessert. Autumn.

Northern Spy—Splendid dessert; blight-proof. Late bearer.

Prince Bismarck—Fruit large to very large, flushed with red and streaked crimson; comes early into bearing, and bears heavy crops; a valuable kitchen variety. Autumn.

Lasscock's Nurseries, Lockleys, South Australia.

- Ribstone Pippin**—Medium size, greenish yellow, clouded with dull red on the sunny side; flesh yellow, with a rich aromatic flavour; a well-known English variety of great excellence where soil and situation suit its requirements. Late Autumn.
- Rokewood** (Bullock's Seedling)—Heavy yielder, and one of the best keepers; good colour. Late.
- Rome Beauty**—Fruit large and handsome; skin yellow, shaded and striped with bright red; flesh yellowish, tender and juicy; a remarkably handsome fruit of good dessert quality; good exporter. Winter.
- Statesman**—Fruit large, bright golden, striped and shaded crimson; a good keeper, very prolific. Winter.
- Stone Pippin**—Fruit large, greenish yellow tinted with dull red; a very solid and late-keeping variety; kitchen. Winter.
- Strawberry Pippin**—Fruit large, yellow and deep red; a very handsome and first-class apple, which does not succeed in many places, and is fast going out of favour on that account; tree a very strong grower; the fruit will keep till August. Winter.
- Scarlet Nonpareil**—Excellent dessert apple, very free bearer; one of the best keeping varieties. Late.
- Tasma** (Democrat)—A Tasmanian seedling; dark red all over; prolific bearer, good flavour, splendid keeper; dessert. This apple sells at high prices at the end of the apple season. Very late.
- Yates**—Good colour, tree very prolific; handsome dessert; requires plenty of moisture. Winter.
-

APRICOTS.

- Carrington**—A New South Wales variety, a heavy bearer; it must be heavily thinned to produce large fruit. Ripens end of December.
- Hemskirke**—Fruit large, resembling "Moorpark," and ripening about the same time; a first-class variety.
- Mansfield Seedling**—Very large, with flattened sides; skin pale yellow, with a few red dots; flavour good; tree a regular and good bearer.

Moorpark (Temple's)—Fruit large; skin yellowish green, brownish red on the sunny side; flesh bright orange, parts freely from the stone; the most popular variety for market, canning, or drying. End of December and early January.

Newcastle Early—Medium size, rich golden yellow with a red cheek; a regular bearer, ripening before "Oullin's" or immediately after "Red Masculine;" requires to be heavily thinned. End of November.

Oullin's Early (Improved)—A seedling from the well-known "Oullin's Early," ripening at the same time; a very heavy bearer. First week in December.

Riverside—A chance seedling which originated in Riverside Nursery; fruit large to very large, roundish oval, of best quality; skin yellowish green with a red cheek where exposed; tree a strong grower, with short-jointed wood and large foliage; a sure bearer of fine fruit, ripening a fortnight before "Moorpark." Middle December.

Riverside Late—Fruit large with slightly flattened sides, flesh solid and good quality; a good bearer; ripening later than Robin's Imperial.

Robin's Imperial (raised by Mr. A. B. Robin, of Nuriootpa)—Fruit medium to large, of good quality; does not commence to ripen till first week in January; a valuable late variety. January.

Royal—Medium, roundish oval; strong grower and most prolific; largely grown in America for drying. Medium.

St. Ambrose—Very large, rich and good; vigorous grower and heavy cropper. Mid season.

Tilton—A new Californian seedling; fruit very large, rich apricot colour, high flavour, uniform ripening, productive, with frost-resisting qualities and vigorous growth which easily places it far in advance of all other varieties; for drying and canning it is much superior to any of the older sorts.

ALMONDS.

Brandise Jordan (originated in South Australia)—The tree is a strong, upright grower; nuts large and sweet; soft shell.

Californian Paper Shell—Tree of spreading habit, strong grower, a heavy and regular bearer of the paper shell type; one of the best.

Chellaston—Tree extremely hardy, and great bearer. Recommended as one of the best.

Commercial—Tree of very strong habit and distinct foliage; nut long and large, with a plump, sweet kernel; tree a regular and abundant bearer; soft shell.

Hatch's Nonpareil—A very fine almond, large kernel, and a very thin shell; the shell of this almond is the thinnest we know of, thus losing very little weight after being shelled.

I.X.L.—A good variety; large nuts, perfect shell. Shy bearer in some places.

Jordan True—A spreading variety. Bears large nuts. Hard shell.

Ne Plus Ultra—Tree a rapid grower, and leaves are large. Produces nuts in bunches. Nuts large and long; fine flavour.

Paper Shell—Very good, easily broken between the fingers.

Peerless—This almond was raised by Mr. H. Wicks, Riserside Nursery, Payneham, S.A. It is without any doubt the prettiest dessert almond, being very smooth and well shaped, large and of fine flavour; shell easily broken between the fingers.

White Nonpareil—Raised and distributed by Mr. Charles Pitt; the tree is a strong grower, of spreading habit; nuts large; white shell; a far heavier bearer than "Brandise."

CHERRIES.

Belle d'Orleans—Tender and juicy; red. Early.

Bedford's Prolific—Large, handsome, black, fine market sort. Medium.

For Better Gardens and Best Results.

- Eigarreau Twyford**—Pale yellow and red; first-class quality. Early.
Black Bohemian—A large black cherry, first-class for market. Medium.
Early Lyons—Very early; black.
Florence—Large, bright red, carries well; one of the most popular varieties. Late.
Knight's Early Black—Richly flavoured, large, heavy bearer. Early.
May Duke—Brownish black, large, heavy bearer, early.
St. Margaret—Very large, black, flesh firm, very valuable. Light kind.
Werder's Early Black—Large, black, fine flavour; heavy cropper.
-

FIGS.

- Black Ischia**—Large, sweet, and rich; skin deep purple.
Castle Kennedy—Large, dark brown, tender, rich flavour. Ripens end of December.
Grosse Verte—Green; very large; rich and excellent. Late.
Madeline—Small pale yellow, very rich, good bearer. Early.
Turkey—Large, fine flavour; brown, with red flesh.
White Provence (White Genoa Sugar Fig)—One of the best. Ripe at Christmas.
-

NECTARINES.

- Albert Victor**—Fruit large; skin greenish white, with a carmine cheek; flesh greenish white, very juicy; ripe middle of January.
Byron (Rivers)—Orange; extra large, flavour rich, heavy cropper.
Cooza—A recently introduced Nectarine of N.S.W. origin. Described by the raiser as very large and of splendid colour. Heavy cropper, with utmost regularity. End of January.

Early Rivers—This grand Nectarine was raised by T. F. Rivers & Son, the English nurserymen; fruit very large, sometimes measuring 9 inches in circumference and weighing 8 ozs.; skin light yellow, marked with red in the shade, rich crimson in the sun. Early.

Goldmine—Fruit very large, roundish oval; colour bright bronzy red; a valuable late Nectarine, ripening just before "Stanwick." Late. The best all-round variety.

Irrewarra—Above medium, good colour; nice flavour. Very early.

Lee's Seedling—Fruit large and brilliantly coloured; very rich flavour; commences to bear very early and is one of the best, ripening this season before "Early Rivers," when Nectarines were scarce.

Lippeatt's Prolific—Fruit round, medium, to large, dark red on greenish yellow ground. Flesh white. Prolific cropper.

Mrs. Dr. Chisholm — A medium-sized, highly-coloured Nectarine, very early, ripening with "Cardinal."

New Boy—Fruit large, skin creamy white, almost covered with brilliant crimson; flesh white, juicy, and sugary, and good flavour; one of the best.

Rivers' Cardinal—Fruit good, medium size, brilliant colour, exquisite distinct flavour; the best early Nectarine, ripens from ten to fourteen days before "Early Rivers." Very early.

Stanwick—Large, nicely flavoured. Late.

W. C. Fripp—A very large, white-fleshed clingstone Nectarine of good quality, colour cream with bright red cheek. Valued on account of its lateness. End of March.

Zelandria—A very large rounded Nectarine, ripening just after "New Boy." Skin light yellow, splashed and streaked with crimson. One of the very best dessert varieties. End January.

PEACHES.

Alexander's Early—Above medium, highly coloured, splendid freestone. Early.

Briggs' Red May—Fruit large when well grown; skin whitish green in the shade, deep red in the sun; flesh tender, juicy, and rich; one of the very best early varieties. Very early.

Early Crawford—Very large, oblong; skin rich golden-yellow, with deep red cheek; flesh yellow, very rich and sugary; excellent market or canning, also one of the best for drying. Middle January.

Elberta—Fruit very large; skin a fine yellow, highly coloured with rich red; flesh firm, very fine grained with an abundance of rich juice; undoubtedly one of the best and most profitable in cultivation for market purposes. End January.

Eureka Cling—Fruit large and round, skin greenish with dark red cheek; tree of strong growth and extremely prolific. A very valuable canning variety.

Finlayson's Seedling—Fruit large, almost round, well coloured and of first quality. Ripens with "Sea Eagle" and is one of the best late Peaches. End of February.

Goodman's Choice—A very valuable canning variety, used extensively in Victoria. Clingstone. Middle March.

Hale's Early—Fruit large, round; skin greenish white, nearly covered with dark rich red; flesh creamy white, juicy, melting, and well flavoured; a valuable Peach, ripening just after the first early varieties. End of December.

High's Early Canada—Fruit large; skin yellowish white, with broken stripes and markings of crimson; flesh tender, rich, and melting; one of the handsomest and best of the very early varieties. December 10 to 20.

J. H. Hale—The Peach that has attracted more attention in America than any other variety. One-third to one-half larger than Elberta; round uniform shape. Colour rich golden yellow, overlaid with carmine. Flesh solid, and merely

with a texture of a cling, yet it is a perfect free-stone, without grain or stringiness. A splendid packer and unusually long keeper. Ripens 5 to 7 days ahead of Elberta. Price, 2s. 6d. each.

Lady Palmerston—Medium to large, globular; skin greenish yellow, marbled and flushed with deep red; flesh yellow, tender, and juicy; it never fails to bear a crop, and is one of the best for market, canning, or drying. February 20 to March 6.

Late Red Italian Cling—Fruit large and almost round, greenish skin, with a dark red cheek. Tree is a strong bearer.

Louis Grognet—Fruit very large; skin cream colour, with dark red cheek, often marked with red; flesh white, very melting and juicy; ripens just after "Hale's Early" and before "Mountain Rose." The tree is a good, strong grower, and bears heavily; this is a variety no market-grower should be without, as it is undoubtedly the finest of its season, and will sell anywhere.

Marquis of Devonshire—Fruit large and round, skin greenish covered dark red. A late Peach of good quality. End of February.

McDevitt's Late Cling—A fine Peach of its class. Its size is enormous: good even shape, and in colour is beyond anything we have seen, being a deep rich yellow. This is a standard variety used in large canning factories.

Mayflower—A French Peach said to ripen about four days before "Sneed." Very large and highly coloured, clingstone, of excellent quality. A new variety of great promise. Price 2/6 each.

Michilin—A recently introduced variety, quite equal in quality and size to "Hale's Early." Very similar, but a better cropper and constant bearer.

Mountain Rose—Fruit large, skin whitish yellow in the shade, but covered with bright, rich red where exposed; flesh tender, melting, and rich; this is one of the best mid-season Peaches, combining size, great beauty, and quality; commences to ripen about second week in January.

Para Grove—Raised from a cross between "Elberta" and a seedling; good colour; large, vigorous, and productive.

Peregrin—Hardy and productive mid-season variety; large and handsome fruit; richly flavoured, and parting readily from the stone.

Phillips' Cling—Fine large yellow cling; the fruit is ideal for canning, being medium to large size, even in outline, of good quality, very small stone; flesh clear yellow right to the stone, without the least sign of red; ripens progressively, so that picking can be extended over 12 to 16 days; will certainly become one of the very best canning sorts, with a big preference by buyers owing to small stone and no red.

Pullar's Cling—A very large, highly-coloured cling-stone peach, and preferred by canning factories. It is a good grower and heavy bearer.

Royal George—Medium to large; skin pale yellowish white, almost covered with red in the sun; flesh tender, melting, and juicy; a well-known mid-season variety, and one of the best for home use. Middle or end of January.

Ruby Red—Large; skin creamy white, almost covered with brilliant red; flesh white; very juicy and melting. Cling.

Salway Improved—A seedling from the well-known "Salway;" it resembles its parent in size and colour, but is slightly rounder, rather better quality, and from a week to a fortnight later.

Sea Eagle—Fruit large to very large; skin pale yellow, with a bright red cheek where exposed; a very heavy bearer and good market variety. Middle to end of February.

Sneed—Fruit medium size oval; skin creamy white, with a delicate red cheek; ripens about ten days before "Red May," but is too soft and delicate to make a good market variety.

Surecrop—A sure and abundant cropper, fruit large and handsome; flesh white and melting, vigorous grower; very hardy; 10th to 20th January.

Triumph—The earliest yellow-flesh peach known; fruit large, round, almost covered with deep red; a valuable variety, ripening immediately after

"Red May" tree a strong, healthy grower and prolific. Third week in December.

Tuscan's Cling—The earliest fine cling variety, ripening with Early Crawford very large yellow fruit, with a little red at the stone; tree vigorous grower and good cropper. Will be much sought after by canners owing to its earliness.

Wiggins—An early freestone of large size, and most highly coloured, ripening just after the first early sorts have finished; tree very hardy and prolific; valuable for market or home use. End of December.

DOUBLE-FLOWERING PEACHES.

Crimson—Flowers very bright crimson.

Pink—Bright pink colour.

White—Flowers pure white.

PLUMS AND PRUNES.

Angelina Burdett—Fruit above medium, roundish, dark purple, rich, juicy, and good for market or drying; the tree is a strong grower, and matured trees bear heavily. Early.

Clyman—Fruit large, skin dark purplish red when ripe; the fruit is three times as large as "Rivers' Prolific," and ripens early; tree a strong grower and enormously productive; the best very early shipping plum. Very early.

Coe's Golden Drop—Large, oval, yellow, juicy, rich, and excellent; good drying, preserving, or dessert. Late.

Diamond—Fruit very large, oval, skin black, covered with blue bloom, flesh yellow; a good preserving variety; tree a very heavy bearer. Mid-season.

Early New Orleans—Medium size, roundish oval, skin dark red, purple in the sun; good dessert or preserving; a first-class market variety. Early.

For Better Gardens and Best Results.

Egg Plum—Fruit very large, oval, skin yellow, covered with thin, white bloom; good cooking or preserving; a constant and heavy bearer. Late.

Grand Duke—Fruit large, oval, deep purple, flesh yellow, firm, very rich and juicy; a very heavy cropper, and one of the best late plums known.

Green Gage—Fruit medium size, round, skin greenish yellow when fully ripe; one of the best-flavoured dessert plums known. January.

Jefferson—Fruit largest size, oval, skin yellow, with reddish cheeks where exposed to the sun; one of the most desirable of all dessert plums, and one of the best for preserving or drying. February.

Kirk's—A first-class variety, large and black. Medium.

Late Black Orleans—A really good plum and a great cropper. Late.

Magnum Bonum Yellow—A large, yellow, and first-class culinary plum; a regular and heavy yielder. Late.

Prince Englebert—Large, purple, dessert or culinary plum. Medium.

Ponds' Seedling—Fruit very large, oval, skin nearly covered with bright red or carmine, flesh yellow, juicy, and sugary; a beautiful fruit; good market or drying. February.

Purple Gage—Medium, round, purple, flesh greenish yellow, rich flavour; will hang for a long time after it is ripe. February.

Prune d'Agen, or French—Large purple; heavy bearer; the best prune grown. Medium.

Prune, Giant—Not a good prune, but excellent for marketing purposes; will shell well; regular and heavy bearer.

Prune, Fellemburg (Italian)—Another good drying and preserving plum. Medium.

Prune, Splendor—Seedling from "d'Agen Prune;" fruit very large and sugar; a freestone; tree very productive, and a healthy and vigorous grower; ripens early for a prune.

Prune, Sugar—Tree very vigorous and productive; fruit extremely large, tender, rich, and very juicy. Very early. Nearly 24 per cent. sugar.

Prune, Tragedy—Very large, purple; one of the finest early plums ever introduced, being as large

Lasscock's Nurseries, Lockleys, South Australia.

as the "Diamond Plum," and ripening just before "Rivers' Early Prolific;" fruit sweet; first-class dessert.

Robe de Sargeant—Medium size, rich and delicious; one of the best.

Rivers' Early Prolific—Below medium, purple, very prolific; excellent preserving, good dessert; tree a very heavy bearer. December.

Red Cherry (American)—An early variety; small fruit. Good breakwind.

Washington—Large yellow plum; good quality. Medium.

DAMSONS.

Cole's Prolific—Good size for a damson; good quality and heavy bearer.

Damson, King of the Damsons—Tree very productive; fruit large and good. Medium.

English—Small, round, purple, good preserving; the tree is an enormous bearer, and the fruit will hang for weeks after it is ripe.

Farleigh Prolific—Fruit large, rounded, enormous bearer.

Shropshire—The best for jam. Medium.

JAPANESE PLUMS.

Admiral Togo—A bright crimson, round, handsome fruit, flesh solid, yellow, rich and juicy. Ripens early.

Burbank—Fruit large, round, red, with a lilac bloom, flesh yellow, very juicy, flavour excellent, tree strong grower and enormous cropper; one of the best Japanese; ripe early January.

Climax—The fruit is heart-shaped, larger than "Burbank," very highly coloured, and is ripe about a week before that variety; tree extremely vigorous and prolific.

Federation—Cross between Burbank and Wickson. Tree resembles Burbank in growth, yet fruit is Wickson in shape, size, and colour. Prolific bearer. Ripe in February.

Formosa—A heavy bearer of fruit; colour red, flesh pale yellow; sweet, rich and delicious.

For Better Gardens and Best Results.

Kelsey—A very large yellow and bright red plum; juicy and rich; very small stone; one of the best for canning and drying; carries well, heavy bearer.

October Purple—This is a very large, purple heart-shaped plum, without splashes of bright colour; flesh amber yellow; red beneath the skin; very juicy and sweet. Clingstone.

Rubio—Very large, oval; crimson skin, very firm and fine quality flesh; strong grower and regular bearer.

Santa Rosa—Fruit very large and purplish crimson in colour; another excellent blood plum, and A1 for dessert; good strong grower; one of the best.

Satsuma (Blood Plum)—Fruit large, round, dark red to the stone, which is small; ripens towards end of February, and will keep for a fortnight after being gathered.

Wickson—Raised by Mr. Luther Burbank, and thus described by him. "Among the many thousands of Japanese I have fruited this one stands pre-eminent in its rare combination of good qualities. The tree is productive almost to a fault, fruit glowing carmine, with a heavy white bloom, stone small, flesh of fine texture, sugary, and delicious; will keep for two weeks or more after ripening."

Wright's Early—Fruit resembles "Burbank" in size and appearance, but ripens much earlier; like "Burbank," it is an enormous bearer, and at present is the best early Japan Plum known.

PEARS.

Bailey's Bergamotte—Very rich and melting fruit; a hardy grower and good bearer.

Clapp's Favourite—One of the best early varieties; before "Williams' Bon Chretien."

Dorondeau—Fruit large and handsome, regularly formed, skin shining as if varnished on the side next the sun, where it is of a lovely crimson, on the shaded side it is almost covered with a thin

Lasscock's Nurseries, Lockleys, South Australia.

coat of cinnamon russet; quality good; ripens March and April; tree an immense bearer.

Glou Morceau—Large pear, yellow skin; flesh is buttery, melting, and very juicy; excellent dessert variety; good for export.

Howell—Fruit large, light waxen yellow; heavy bearer, following "Williams' Bon Chretien;" a first-class market pear, and should be largely grown.

Josephine de Malines—Medium size, roundish oblong. skin greenish yellow, flesh very juicy, melting, and richly flavoured; a good bearer and long keeper. Winter.

Kieffer—A first-class variety, medium size, pineapple flavour, strong grower, very prolific; second best for canning. Late.

Packham's Triumph—Raised by Mr. Packham, Molong, New South Wales; beautiful shape, large, good flavour; early and good cropper; ripe in April; good shipper; one of the best.

Vicar of Winkfield (Napoleon)—Large, juicy; heavy cropper; fine for market; good for export. Late.

Wilder—One of the earliest, good keeper and shipper; tree very vigorous; fruit medium, bell-shaped; pale yellow, with deep shading of brownish carmine, flesh whitish yellow, fine grained, tender, flavour sub-acid, sprightly, of good quality, very productive; probably the best early market pear. Summer.

Williams' Bon Chretien (Bartlett) — Commonly called "Duchesse" in this State; fruit large, skin clear yellow, sometimes tinged red, flesh melting, buttery, with a powerful musky aroma; the best of its season.

Winter Cole—Medium pale yellow and russet; flesh melting, exceedingly rich and juicy. Exquisite flavor. Winter.

LOQUATS.

2s. 6d. each.

Chatsworth Victory—Fruit very large, with thick flesh; ripens late, and is of a very superior quality; the tree is a strong grower and good bearer, and is undoubtedly one of the best.

Early Oval—Fruit large, oval; a first-class loquat, and the earliest to ripen.

Enormity—The largest and finest Loquat grown; very large fruit and good cropper. Price, 3s. 6d. each.

Herd's Mammoth—Fruit nearly as large as "Chatsworth Victory," but ripening a little earlier; both varieties produce magnificent fruit if given good cultivation.

Large Round—Fruit very large, round, good quality; ripens very late.

QUINCES.

Apple-Shaped—Of medium size, juicy, and very nice for culinary purposes; productive.

Campion—A splendid American variety; fruit very large, flesh tender, the latest keeping variety.

Missouri Mammoth—Extra large fruit of excellent flavour; sturdy grower; prolific and early.

Masters' Early—Fruit large and good, roundish, skin golden-yellow; a very handsome Quince.

Pear-Shaped—Large fruit of a first-class quality; medium.

Pineapple—Fruit medium size, clear golden-yellow; makes a superior jelly, and is said to cook as tender in five minutes as the best cooking apple, possessing a most exquisite and delicious flavour.

Smyrna—The tree is a rapid strong grower, and immensely prolific; commences to bear the second year from the bud; the fruit is very large and of a lovely yellow-lemon colour, presenting a fine appearance; the flesh when cooked is very tender, having a delicious flavour; ripens in April, and will keep till September.

MULBERRIES.

Black English—Makes a very fine tree for shade; the fruit also is useful for dessert or cooking.
2s. 6d.

CITRUS FRUITS.

MANDARINS.

4s. each; 45s. dozen.

Beauty of Glen Retreat—Very handsome; good flavour; very productive tree.

Emperor—Largest of fruit, very juicy; an excellent market kind. Good bearer.

Thorny—An enormous cropper of medium size; juicy and sweet flavoured.

Dancy's—Medium size, flat, almost scarlet; excellent quality; vigorous grower.

Canton—Large and prolific; fine flavor.

Japanese Seedless—Very large, early red.

Nobilis—Medium size, flat, solid; good.

Parker's Special—Very large, smooth, very early; vigorous grower.

ORANGES.

Blood—High quality of flavour; pulp a deep red when ripe.

Joppa—Strong grower, very productive.

Parramatta—Fruit large and juicy; strong grower; good bearer.

St. Michael—Large, thin-skinned fruit, very few seeds; good bearer.

Siletta—Skin pale yellow, flavour good; one of the hardiest and best.

Washington Navel—Fruit very large, seedless, pulp juicy and well flavoured; strong grower and good bearer.

LEMONS.

CITRONS.

POORMAN'S

PERSIMMONS.

2s. 6d. each.

The fruit of the Persimmon, when ripe, is of a deep reddish orange colour; shape that of an orange.

The flavour when perfectly ripe is most luscious. It is best kept for a time after being picked, and is then most delicious. The fruit ripens during winter, and is in consequence valuable for the table at a season when fruit is scarce.

Dai Dai Maru—Fruit of the largest size, square, or four-sided, rather flattened; skin deep orange; flesh yellow; almost seedless; fine variety, and early.

Hyakumo—Very large, round, orange-vermilion, russety at point; should be allowed to hang till soft.

Kuro Kumo—Medium size, almost round, yellowish red; ripens on tree.

Yemon—Large, tomato-shaped, skin light yellow, changing to dark red; almost seedless

VINES.

Extra strong.

9d. each; 7s. 6d. dozen; 30s. per 100; and £8 per 1,000.

Beals Blanco—Large bunches of oval berries; a late greenish-white grape; a very good variety for packing.

Black Alicante—Black. Late.

Black Frontignac—Very rich vinous flavour; small, early.

Black Hambro—Thin skin; rich and juicy.

Black Prince—Very fine oval, black; rich juicy and sugary.

Black Mammoth—Black. Medium.

Black Muscat (Mrs. Princes)—Bunches large, tapering berries, medium, oval, skin purplish-black. Late.

Cornelian (Quick's Early)—White. Early.

Centennial—Berries large, yellowish green; does not crop well in South Australia.

Crystal—Bunch large berries, medium to large, skin white; one of the best. Medium.

Doradilla—Bunch large and closely set, berries medium to large, amber; a tremendous bearer and a good late packing grape.

- Grand Turk**—Large bunches, berries black; ripens soon after mid-season, but will keep for a considerable time on the vine, if kept dry.
- Green's Early**—Berries and bunch medium, skin greenish white; sets well, ripens very early.
- Gros Colman**—Bunches very large; berries large and round, skin dark purple or black, flesh juicy and sweet.
- Lady's Finger**—Bunches medium to large; loose berries, long and tapering at both ends, skin greenish, becoming quite pink when ripe. Late.
- Malaga (Black)**—Bunch large, berries medium oval; skin tough, hangs late and carries well.
- Malaga (Red)**—Bunch large, berries large, roundish oval, skin red or reddish-purple when fully ripe.
- Mrs. Pince's Black Muscatel**—Black. Late.
- Muscat Alexandria**—Bunch large, loose berries, large, oval, skin pale amber, sets very badly.
- Muscat Gordo Blanco**—Bunch large, berries large, pale amber; a good bearer and the best for drying.
- Muscat Hamburgh**—Berries medium, oval, dark reddish purple, becoming black when fully ripe.
- Pedro Ximines**—Bunch and berries medium, pale amber, juicy, sweet, and well flavoured. Early.
- Raisin des Dames**—Large, greenish white. Early.
- Red Frontignac**—Very early; rich, musky flavour.
- Red Muscat (Woods)**—This is a sport from the well-known "Muscat Gordo Blanco," but the berries are of a beautiful red colour.
- Red Prince**—Bunches very large, berries large, round, of a deep red colour, becoming almost purple when fully ripe, flesh sweet, firm, and of fairly good flavour. Medium to late.
- Royal Ascot**—Black. Early.
- Santa Paula**—In shape like Lady's Finger; a beautiful light colour; large bunches. Late.
- Sultana**—Bunches medium size and long, berries oval, skin pale yellow, flesh without seeds. Valuable for raisin-making.
- Sweetwater**—Bunches medium size, berries round, greenish white; an old favourite. Early.
- Temperano**—Large, pale amber, flesh tender and very juicy. Early.
- Ulliade**—Black oval, medium berries; heavy cropper and good flavour. Medium.

For Better Gardens and Best Results.

Waltham Cross—Bunch very large, long, and tapering, skin pale amber, flesh firm and solid, with a brisk, pleasant flavour; one of the largest grapes in cultivation; good market or packing.

White Frontignac—Very rich, fine flavour; straw colour.

Wortley Hall—Bunch and berry very large, berries round, black, generally bears a heavy second crop, which are useful for making jelly.

Zante Currant—This is the Currant of Commerce, and is being extensively planted in this State for drying purposes; black, juicy, and sweet berries.

All the Vines this season are remarkably strong, well-rooted plants. Those who are wanting quantities should inspect our plants before ordering elsewhere.

- E. **Habrothamnus Elegans**.—Bright red; very free flowering. 6 ft. Price, 1s.

HIBISCUS.

These rank among the very best of our showy, flowering shrubs, and should be in every garden. Being hardy, they will do well in most parts of S.A. They grow to about 6 ft. in height. We have a particularly fine stock of all the leading varieties, strong, well-grown plants in pots, having made a speciality of these beautiful shrubs. All the following varieties are evergreen.

Conqueror—Rich apricot, with velvet plum-coloured throat, single and very large blooms, specially recommended, quite distinct. Price, 2s. 6d. each.

General Courteges—Scarlet, very large flowers. The best single variety at 1s. 6d. each.

Harwoodi—Single pink, with dark centre, very showy. Price, 1s. 6d. each.

Island Empress—The best double Hibiscus grown, very large flowers of a beautiful dark rose colour, at 2s. 6d. each.

Island Queen—Deep rose, single, splendid form and size, 1s. 6d. each.

Lambertiana—Double scarlet, very good sort, at 2s. 6d. each.

New Hibiscus Indica—A really excellent novelty, striking and distinct colour, which is best described as rosy apricot; a good, strong grower and very free-flowering; 2s. 6d. each.

Peachblow—Salmon pink, shading darker towards the centre, semi-double and freely produced at 2s. 6d. each.

Splendens—Single scarlet, very hardy and strong grower, 1s. 6d. each.

D. **Hydrangea Hortensis**—Pink. 3 ft. Price, 1s. 6d. upwards.

D. **Hydrangea Madame Moulliere**—Very large white; the best white variety. 2 ft. Price, 1s. 6d.

E. **Hypericum Moserianum**—Large yellow; very handsome. 2 ft. Price, 1s. 6d.

E. **Jacaranda Mimosaefolia**—Blue; magnificent trees; fern-like foliage, producing masses lavender blue flowers. 30 ft. Price, 1s. 6d.

Lasscock's Nurseries, Lockleys, South Australia.

- E. **Jasminum Grandiflorum**—Large white. 6 ft.
Price, 1s. 6d.
- E. **Jasminum Primulinum**—Very large pure yellow
flowers. 4 ft. Price, 1s. 6d.
- E. **Lagunaria (Fugosia) Patersoni**—Pink. 25 ft.
Price, 1s. 6d.
- E. **Lantana (Chelsea Gem)**—Rich crimson and
amber. 2 ft. Price, 1s. 6d.
- E. **Lantana Drap d'Or**—Orange yellow. 3 ft.
Price, 1s. 6d.
- E. **Lantana Diadem**—Pale yellow and rose. 3 ft.
Price, 1s. 6d.
- E. **Lantana Golconde**—Orange. 3 ft. Price, 1s. 6d.
- E. **Lantana Gol Gol.**—Lovely shade old gold. 3
ft. Price, 1s. 6d.
- E. **Lantana Imperatrice Eugenie**—Rose and cream.
3 ft. Price, 1s. 6d.

NON-WARRANTY.

All who have had any experience with Seeds, Bulbs, Roots, and Trees are aware that failures do occur from a variety of causes, and for which it would be infinitely unreasonable to attach the slightest blame to the Nurseryman and Seedsman. It must therefore be clearly understood that, while taking every possible precaution to prevent disappointment, I give no warranty, expressed or implied, as to growth, description, quality, or productiveness, and will not be in any way responsible for the crop.
